

who we are?

Esart Gallery was founded in June, 1990, with two very clear ideas on his aim.

The first one is her of offering (to the public and concretely to the lovers of the art) the opportunity to enjoy and to be able to choose works of selected artists, in a central space, Advising the most oportune work the public for the occasion.

The second one is her of the artists promote by means of exhibitions on his works, already be individual or collective.

The fact of possessing two own spaces to be able to exhibit, allows that once finished the exhibition in strict sense in one of the rooms, the artist can remain one more time with some of his more important works exposed in the interior room of the gallery, for that the public could continue enjoying one more time of the work of the artist exhibitor together with the work of other artists also exhibitors in this gallery.

To this different activities related to the art must add him, how: presentations of books, concerts of music, editions of catalogues, recitals of poetry, etc. Always with the incessant will to protect and promote the art in all his slopes.

This year has arisen the idea of incorporating, in the programming of exhibitions, samples of other cultures and countries as the Japan, France, Italy, Argentina, Russia...

Different forms and styles of representing the art. Different but very been worth, that help us to enrich even more our principal idea.

“Even when the hope and the science trump us, the art will survive.”
